● Introduction

Activated Charcoal A Practical Solution for a Cleaner and Greener Future

Activated charcoal is a highly versatile material with proven benefits for health, personal care, and the environment. Its exceptional ability to absorb toxins and impurities makes it indispensable in applications like water purification, air filtration, Gold and precious metal and medical detoxification.

In personal care, activated charcoal is widely used in skincare and oral hygiene products. It helps cleanse pores, control excess oil, and treat acne, while its natural detoxifying properties make it effective in teeth whitening and eliminating bad breath.

Incorporating activated charcoal into daily life also contributes to waste reduction and supports recycling efforts, helping maintain ecological balance. By choosing this eco-friendly material, we can take meaningful steps toward a sustainable future while enhancing both personal well-being and environmental quality.

Make a conscious choice—use activated charcoal to protect your health, elevate your self-care routine, and safeguard the planet. Small actions lead to significant impacts, and together we can create a cleaner, healthier, and greener world.

ABOUT COMPANY

PT Kellen Mulia Deversity is a leading Indonesian company specializing in the production and export of high-quality activated carbon made from coconut shell. Headquartered in Tanjungsari , Bogor, West Java, with factories located in Bogor and Java, we are committed to delivering premium-grade products sourced from the finest Indonesian coconuts.

Our main focus is on activated carbon, which is widely used in water purification, air filtration, gold recovery, and other industrial applications. With strict quality control and sustainable production practices, we ensure that our activated carbon meets the highest standards required by both domestic and international markets.

As an export-oriented company, PT Kellen Mulia Deversity continues to expand its global network to deliver Indonesian best activated carbon based on coconut shell to the world. We are dedicated to providing top-quality solutions with guaranteed product excellence, professional service, and environmentally responsible processes.

What We Do ?

We provide high-quality activated carbon products designed to meet various industrial, environmental, and human health needs. Using advanced technology and premium raw materials, we deliver the best solutions for:

1. Water Filtration:

Our activated carbon effectively removes contaminants, odors, and discoloration from water, ensuring cleaner and safer water for households, industries, and the environment.

2. Air Purification:

Our products absorb air pollutants, harmful gases, and odors, enhancing air quality in enclosed spaces and industrial settings.

3. Human Health Care:

Our activated carbon is also used in medical applications, such as:

- **Detoxification:** Absorbing toxins and harmful substances in cases of poisoning.
- **Digestive Care:** Relieving digestive issues by absorbing excess gas and toxins.
- **Skin Care Products:** Used in facial masks and skincare products to absorb oil, dirt, and toxins from the skin.

4. Gold and Precious Metal Recovery:

With optimal adsorption capacity, our activated carbon is highly effective in separating and purifying precious metals from ore.

5. Waste Treatment:

Our activated carbon solutions help absorb organic compounds and hazardous chemicals, supporting environmentally friendly waste management practices.

We are committed to providing innovative and multifunctional activated carbon products, enabling our customers to achieve efficiency and sustainability across various aspects of life and industry.

OUR VALUE

1. Sustainability

We are committed to supporting environmental sustainability through eco-friendly activated carbon products and responsible business practices.

2. Innovation

We continuously innovate in the development of activated carbon using advanced technologies, ensuring high quality and optimal adsorption capacity for various applications.

3. Quality

Every product we produce meets the highest quality standards, providing reliable and effective solutions for our customers' needs.

4. Commitment to Health and Environment

We believe that air quality, water quality, and human health are top priorities. Our products are designed to maximize benefits in improving quality of life and protecting the environment.

5. Partnership and Collaboration

We highly value partnerships with customers, communities, and environmental organizations to create positive impacts together.

6. Social Responsibility

We contribute to reducing the carbon footprint and support environmental preservation efforts through sustainable business practices and educational campaigns.

7. Flexibility and Customized Solutions

We understand that every customer's need is unique. Our activated carbon products can be customized to meet specific requirements, whether for industrial, health, or environmental purposes.

With these values, we ensure that our products and services not only meet market demands but also support global sustainability goals.

BENEFITS

Benefits of Purchasing Activated Carbon from Us

One of the key benefits for customers purchasing activated carbon from us is the flexibility we offer. We understand that each customer's needs are unique, and therefore:

1. Custom Requests

Customers can make specific requests tailored to their unique requirements. We are open to producing activated carbon that is customized in terms of shape, size, or specific applications.

2. Customizable Specifications

We also accommodate requests for specific technical specifications, such as porosity levels, adsorption capacity, raw materials, or particular quality standards, ensuring that our products align with the desired applications, whether for industrial, health, or environmental purposes.

3. Packaging Customization

In addition to product specifications, we provide flexibility in terms of packaging. If customers require specific packaging needs, such as using their own design or branded packaging, we are ready to accommodate. This ensures that the product not only fulfills its technical functions but also supports the customer's branding efforts effectively.

With these capabilities, we ensure that every customer receives the best solutions that are accurate, efficient, and tailored to their specific needs. This also reflects our commitment to delivering personalized services with a focus on customer satisfaction.

Our Product

Activated Carbon

We provide high-quality activated carbon products with the following specifications:

1. Iodine Content (IODINE):

- 800 mg/g: For Standard Needs.
- 1000-1100 mg/g: For Medium to High Needs.
- 1200 mg/g: For applications with The Highest Adsorption Requirements.

2. Ash Content (ASH CONTENT):

- Consistently at 1,3%, Ensuring Product Purity and High Efficiency.

3. Moisture Content (MOISTURE):

- Maintained at a level of <10% for Product Stability and Quality During Storage.

4. Particle Size (MESH):

- Available in sizes 2x6 2x8 4x8 6x12 8x30 etc. depend on customer order, suitable for various industrial applications.

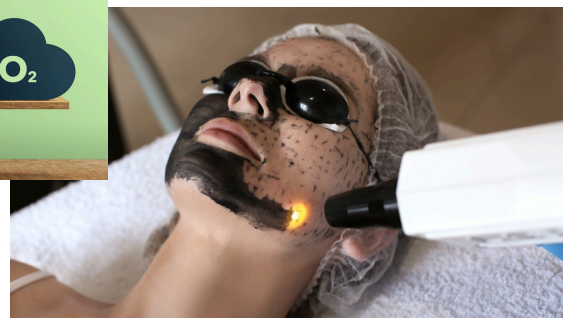

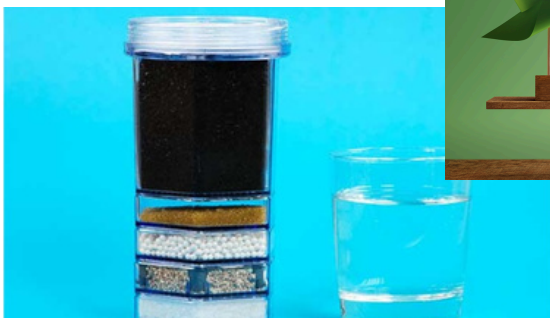

Benefits From Our Product

- **High adsorption capability:** Effective for removing contaminants, organic compounds, and unpleasant odors.
- **Multifunctional applications:** Suitable for water purification, air treatment, food and beverage industry, and other industrial applications.
- **Support for human health:** Used in the medical field for body detoxification, addressing poisoning, and supporting certain healthcare treatments.
- **Consistent quality:** With strict quality control, our products always meet the highest standards.
- **Environmentally friendly:** Produced sustainably to support environmental preservation.

Our Product Certifications:

- COA
- ROA
- MSDS
- SHTC
- Halal Certificate
